

## Java

```
class Solution {  
    public boolean buddyStrings(String s, String goal) {  
  
    }  
}
```

---

## JavaScript

```
/**  
 * @param {string} s  
 * @param {string} goal  
 * @return {boolean}  
 */  
var buddyStrings = function(s, goal) {  
  
};
```

---

## C++

```
class Solution {  
public:  
    bool buddyStrings(string s, string goal) {  
  
    }  
};
```

---

## C#

```
public class Solution {  
    public bool BuddyStrings(string s, string goal) {  
  
    }  
}
```

---
